Profile

Senior Fullstack Engineer with 9+ years of experience designing and building scalable SaaS, government systems, and data-intensive applications. Specialized in Python (FastAPI/Flask), Node.js (NestJS), React/Next.js, and workflow automation. Proven track record delivering mission-critical systems for public sector organizations and international startups.

Key Achievements

- 9+ years of software engineering experience.
- Delivered software solutions for Indonesian government institutions.
- Built healthcare data automation pipelines for the Ministry of Health.
- Led migration of enterprise frontend architecture from Vue 2 to Vue 3.
- Designed workflow automation using Apache Airflow, Celery, and n8n.
- Experienced in PostgreSQL query optimization and scalable API design.

Professional Experience

August 2024 – October 2025 Hongkong SAR	Fullstack Engineer At Flowclass Developed and maintained an EdTech platform that automates course enrollment, billing cycles, invoicing, and student reminder workflows. Key Contributions: • Designed and developed scalable REST APIs using NestJS and PostgreSQL. • Built responsive frontend applications using React, Next.js, and TypeScript. • Implemented workflow automation for enrollment and payment reminders using n8n. • Optimized PostgreSQL queries and JSON aggregation for complex reporting requirements. • Participated in code reviews, technical documentation, and agile development processes. Technologies: React, Next.js, TypeScript, NestJS, PostgreSQL, Docker, n8n, GitLab CI/CD
August 2023 – August 2024 Mataram, Indonesia	Independent Fullstack Consultant Delivered software solutions for government institutions, SMEs, and private organizations. Key Contributions: • Developed custom web applications and automation systems. • Built and maintained APIs, dashboards, and workflow automation solutions. • Worked with clients from public and private sectors to transform business requirements into scalable software products.
2021 – July 2023 Hongkong SAR	Quokka HR, Fullstack Engineer QuokkaHR is a SaaS employee engagement platform focused on building high-performing teams. Key Contributions: • Led migration of frontend architecture from Vue 2 to Vue 3. • Developed and maintained APIs and frontend applications. • Built administrative back-office systems. • Led frontend code reviews and mentored team members. • Collaborated closely with product managers, designers, CTO, and CEO. Technologies: Vue.js, Vue 3, Nuxt.js, Flask, GraphQL, PostgreSQL, Vite

2017 – 2021
Mataram,
Indonesia

ITEC Mataram , Fullstack Engineer

Worked on multiple government and commercial software projects while also serving as a programming mentor.

Key Contributions:

- Developed government information systems and internal business applications.
- Designed databases and application architectures.
- Built and maintained Point-of-Sale (POS) systems.
- Mentored students in software development programs.

Technologies: React, Python, Flask, FastAPI, TypeScript, NestJS, PostgreSQL, Docker, n8n, GitLab CI/CD

2016 – 2017
Mataram,
Indonesia

Lombok CyberLab, Junior Full Stack Engineer

Participated in web application development and software maintenance projects while building foundational fullstack engineering experience.

 Education

2013 – 2016
Selong, Indonesia

Hamzanwadi University, Associate Degree in Information Management

 Skills

Backend

Python, FastAPI, Flask, Node.js, NestJS, SQLAlchemy, Celery

Frontend

React.js, Next.js, Vue.js, Nuxt.js, TypeScript, Tailwind CSS

Database

PostgreSQL, MySQL, Redis, MariaDB, No SQL (MongoDB)

Data Engineering

Apache Airflow, Pandas, Dask

DevOps

Docker, Nginx, Git, GitLab CI/CD

Automation

n8n

 Projects

August 2024 –
October 2025

FlowClass - Education Management Platform

Achievements:

- Designed and delivered a complete enrollment management system supporting both regular and recurring courses.
- Implemented automated billing-cycle processing and invoice generation workflows, reducing manual administrative operations.
- Developed configurable prerequisite validation mechanisms to enforce enrollment eligibility across courses and classes.
- Built workflow automation for enrollment notifications, payment reminders, and operational tasks using n8n.
- Improved reporting performance by optimizing complex PostgreSQL queries and JSON aggregation processes.
- Developed scalable REST APIs and frontend modules supporting enrollment, invoicing, reporting, and automation features.

Technologies: NestJS, PostgreSQL, React, Next.js, TypeScript, Docker, n8n

January 2024 –
August 2024

Ministry of Health Indonesia – BPJS Data Automation

Achievements:

- Automated BPJS healthcare data ingestion and cleansing workflows using Apache Airflow and Python.

- Built distributed data-processing pipelines capable of handling large healthcare datasets efficiently.
- Improved data quality and consistency for downstream reporting and analysis.
- Reduced manual data-processing activities through workflow orchestration and automation.
- Developed data validation and transformation processes to support operational requirements.

Technologies: Python, Apache Airflow, Dask, Pandas, PostgreSQL

November 2023 –
June 2024

Ludes.in - Point of Sales Platform

Developed backend services and APIs for a POS platform supporting inventory and transaction management for SMEs.

Achievements:

- Built scalable REST APIs using NestJS.
- Implemented testing and code review processes.
- Collaborated with cross-functional teams in agile development environments.

Technologies: NestJS, PostgreSQL, React, React Native, Tailwind CSS

October 2021 –
December 2024

Employee Management System at Bima City

Employee Management System and Attendance Management System

Designed and developed an integrated employee management and attendance platform for the **Bima City Government**.

Achievements:

- Integrated attendance devices with centralized government systems.
- Implemented secure data exchange mechanisms with E-Kinerja.
- Designed database architecture and system workflows.
- Managed deployment, maintenance, troubleshooting, and scaling.

Technologies: Python, FastAPI, Flask, PostgreSQL, Redis, Celery, Vue.js
